

How we write sentences

Step one:

Thinking of, and then saying a sentence aloud. At school we use sound buttons. At home you could record on a phone, tablet or other recording device.

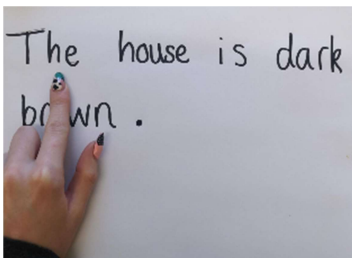

Step two:

Count on your fingers how many words are in your sentence (this helps break the sentence into words).

Step three:

Write your sentence using a sound card, colour display or 'word wall' to help if needed. REMEMBER to use finger spaces once you have finished a word, before you start a new one. Finish with a full stop. What goes at the beginning of a sentence (capital letter)?

Step 5:

Read through the sentence you have written, pointing to each word as you go. If you spot a mistake, don't worry, you can change it!
