

# Measuring

## Year 3 Challenge

Can you make a family maths poster, film, powerpoint or leaflet that explores and compares different measurements...

- Who is the tallest/shortest?
- What is the longest /shortest book?
- What is the heaviest/ lightest cup or mug?
- Which is the highest/lowest picture on a wall?
- Who gets up the earliest/latest?
- Who goes to the bed the earliest/ latest?
- What is the tallest/shortest cupboard?
- Who has the biggest/ smallest feet?
- Who is born in the earliest/latest month of the year?

Please add the different measurements using a ruler/tape measure/scales where you can! Feel free to add your own comparisons of measurements.

You can add drawings, flaps and photos to your poster to make it fun to share. Please bring in your 'Measuring' work when you have completed it and we will share it. Have fun and good luck with this challenge!
