

My Numbers

Year 3 Family Maths Challenge

Can you make a family maths poster, film, powerpoint or painting that explores your important numbers. You could include...

- Who is the oldest?
- Whose name has the most letters?
- What is your special number and why?
- Are there other numbers you don't like and why?
- How many windows/doors in your house?
- What is the highest odd number on your street?
- What's the lowest even number in your street?
- Can you add all the ages in your house together?

You can add drawings, flaps and photos to your poster to make it fun to share. Please bring your 'My Numbers' work in by Friday 20th October. Have fun and good luck with this challenge!
